Techno Economic Viability

Techno Economic Viability (TEV) / Feasibility Study services are required by Banks / Financial Institutions to understand the risks inherent in any financing / investments in various green field or expansion projects.

Techno Economic Viability

Techno Economic Viability (TEV) / Feasibility Study services are required by Banks / Financial Institutions to understand the risks inherent in any financing / investments in various green field or expansion projects. The feasibility study includes the review of technical as well as the financial aspects of a project.

The purpose of Techno Economic Viability study is to aid the sanctioning authority to arrive at an informed judgment as regards acceptability of the project for lending (or investment) purpose.

RBSA has the capability of undertaking technical and economic viability studies and has worked effectively with engineering organizations, land appraisers, stock brokers, investment bankers, accounting and auditing companies and legal consultants. These techno economic viability studies will be prepared in compliance with the requirements and guides of all concerned regulatory authorities.

RBSA’s Techno Economic Viability Study provides appraisal of techno-commercial parameters of a project and its impact on RBSA’s Techno Economic Viability Study provides an appraisal of techno-commercial parameters of a project and its impact on the financial viability. Our services include appraisal of technical aspects of the project, study of the competitive business environment and its impact on the finances.
RBSA provides end to end services in this space by providing detailed forecast assessment of any new or existing project, detailed analysis of costs, independent market research, viability of the project, and providing suggestions and recommendations to the project owner.

Our strategy and implementation process includes exploring issues such as:

- Business Opportunity Scanning
- Market Research
- Technical Feasibility
- Project Cost Estimation
- Operating Cost Estimations
- Resource Requirements
- Suggested Funding Patterns
- Financial Feasibility
